## Summary

Software Engineer with experience building web, mobile, e-commerce, and GIS-based applications. Worked in a small engineering team developing client-facing software using TypeScript, React, React Native, PostgreSQL, and AWS while collaborating directly with clients and stakeholders to understand business requirements and deliver practical solutions.

## Skills

**Languages:** JavaScript, TypeScript

**Frontend:** React.js, Next.js, React Native (Expo), SvelteKit, Remix

**Styling & UI Tools :** Tailwind CSS, GSAP, Figma

**GIS & Data:** QGIS, Vector Databases

**Cloud :** AWS (Lambda, EC2, S3, Route 53), Linux, Git

**Backend:** Node.js, Postgres

## Experience

### Software Engineer

Sep 2025 – Present

- Build and maintain client-facing applications using TypeScript, React, PostgreSQL, and AWS in a small engineering team..
- Developed and shipped a Shopify application for supplier-managed fulfillment workflows.
- Worked on GIS-related projects involving QGIS, geospatial data, and vector databases.
- Collaborate directly with clients and end users to gather requirements and improve application usability.

### Freelance Developer

Aug 2024 – Aug 2025

- Built custom web applications and business websites for clients.
- Developed [SalesGo](#), a billing and inventory management platform with web and mobile applications.

## Projects

### [Namaste Service](#) | React, React Native

- Primary frontend contributor to a centralized platform for customers, technicians, and authorized service centers.
- Work directly with service-center stakeholders to define workflows, prioritize features, and translate operational requirements into product features.

### Shopify Supplier Fulfillment App | TypeScript, Remix, Shopify APIs

- Developed and shipped a Shopify application enabling merchants to sell supplier products through their own stores, gaining hands-on experience with the Shopify ecosystem, app lifecycle, and merchant workflows.
- Implemented fulfillment and synchronization workflows between merchants and suppliers.

### [Chithram](#) | SvelteKit, GSAP

- Built a motion-focused UI showcase exploring SvelteKit and modern frontend animation techniques.

## Education

Calicut University – B.Sc in Computer Science May 2024

- C++ focused coursework in Data Structures, Algorithms, OOP and Systems Programming

## Hackathon & Competition

- **Hackify 2024 (Solo)** : Built a WebRTC-based [peer-to-peer chat application](#).
- **Magnathon 2024**: Led UI design for a disaster response coordination platform.
- **IEDC Hackathon 2024**: Designed user flows and interfaces for a rural waste collection tracking system.
